

Building an Employers' Council

Imagine, an Employers' Council for North Bay that is driven by local employers to identify and steer programs to help resolve their own labour force needs.

We are aware of the labour force realities that employers are facing - high number of retirements, an aging population with low birthrates and a reliance on skilled newcomers to meet the organizational human resources needs.

Does this sound like something you would like to explore?

You are invited to an **Employers' Breakfast** hosted by the North Bay & District Chamber of Commerce to discuss this global issue.
